

Master Thesis:

„Transforming Account Management within pallet pooling business “

About Brambles/ CHEP

CHEP helps move more goods to more people, in more places than any other organization on earth via our 300 million pallets, crates and containers. We employ 11,000 people and operate in more than 55 countries. Through our pioneering and sustainable share-and-reuse business model, the world’s biggest brands trust us to help them transport their goods more efficiently, safely and with less environmental impact.

What does that mean for you? You’ll join an international organization big enough to take you anywhere, and small enough to get you there sooner. You’ll help change how goods get to market and contribute to global sustainability. You’ll be empowered to bring your authentic self to work and be surrounded by diverse and driven professionals. And you can maximize your work-life balance and flexibility through our Hybrid Work Model.

Problem Statement

Our customers are obliged to audit their stock of our pallets every year, so that we maintain control over our asset. Losses or surpluses are charged to the customer as part of an audit invoice.

Not only do we want to ensure that our customers can plan their costs reliably and support them as closely as possible with stock control during the year, but this audits also have a major impact on our P&L. We have various KPIs at our disposal for this purpose, which we supplement with digital analysis tools. Due to fluctuations in business or customer reporting behavior, the forecasting is not yet precise enough to also support our integrated business planning.

Target

You will have full access to all the necessary data and teams to help you analyze the problem from different market sectors. Based on your findings, you will develop a proposal for a forecasting tool that will help us and our customers to avoid unpleasant surprises.

Master Thesis: „Transforming Account Management within pallet pooling business “

Application Prozess

If you are interested, please send your CV by email to luis.nabais@chep.com.

Become part of our team and help us optimize the efficiency and accuracy of our pallet audit control! We look forward to receiving your application.
